

Hackathon Presentation & Live Demo Plan

Smart Waste Intelligence Platform (SWIP) • Hackathon Software Demo

1. The Core Pitch

"We don't just report garbage. We detect it, predict it, dispatch the right resource, verify collection, and learn from the data."

2. The 5 Screens for Judges

- **Screen A (Admin Command Center):** 12 critical bins, 27 open complaints, 84 pickups today, 5 hotspots, real-time map.
- **Screen B (Smart Bins Monitor):** Digital twin fleet view with live telemetry and interactive sensor simulator.
- **Screen C (Live IoT Trigger):** Interactive simulation setting Bin B-102 to 95% fill, triggering automated critical alarm.
- **Screen D (AI & Operations):** Automated prioritization, route sequence, and crew assignment.
- **Screen E (Worker Task Execution):** Worker Rahul accepts task, marks arrived, uploads photo proof, empties bin, and resolves ticket.

3. Hackathon Success Metrics

Flawless execution of the 60-second closed loop demonstration showing software-first completeness.
